Process Automation Superbadge:

Challenge 1:
Automate leads

There are 3 major requirements here testing the knowledge of Create validation and assignment rules.

Req 1:
Is there any way you can prevent a lead from being created if the lead isn't located in a US state and make sure that all leads have the standard 2-character US state abbreviation in the State/Province field and either US, USA, United States, or nothing in the Country field
Req 2:
Routing leads to the right group
Leads from the website get assigned to the Rainbow Sales team, and leads from partners and purchased lists get assigned to Assembly System Sales.

Challenge 2:
Automate Accounts

The second requirement deals with Account object and creation of the rollup summary fields and formula fields

Req 1:
New account cannot be created unless the shipping and billing state fields are valid US state abbreviations, and the country field is either blank or US, USA, or United States Req 2:
If the account type is either "Customer - Direct" or "Customer - Channel" we don't want anybody to change the name.
Req 3:
Rollup Summary fields :number of deals, number of won deals, when the last deal was won, what our win percentage is, and the total amount of deals we won. and Call for Service formula fields

Challenge 3:
Create Robot Setup Object

Req 1:
Every sale we close and win, we need a setup record created that we can use for scheduling. If we delete a deal for any reason the setup record should also be deleted. We need to see the setup date and we also need a spot for the technician or the rep to make notes about the setup.

Req 2:
Automatically calculate and display which day of the week the setup date is, like Monday, Tuesday, Friday.

Req 3:
Records can just be auto-numbered like ROBOT SETUP

Challenge 4:

Create Sales Process and Validate Opportunities

Req 1:
Stages to be used in Sales process Prospecting, Qualification, Proposal/Price Quote, Negotiation/Review, Awaiting Approval, Closed Won, and Closed Lost

Req 2:
Biggest deals--anything over $100K--have to be approved before they can close.We should have a way to show on the record that the deal is approved--maybe you can add an “Approved” checkbox to the opportunity.

Challenge 5:
Automate Opportunity Create an approval process as defined below which will invoked using Process Builder

Challenge 6: Create Flow for Opportunities:

Challenge 7 :
Automate Setups

In the ProcessBuilder created above , for the RobotSetup record action steps , update the formula for date field
